

ELK MEADOWS FUELS REDUCTION JIMMY REED BURN AREA

MAP #4

Proposed Action:

1. Apply hand and aerial ignition to ignite 50%-70% of the acreage or until a maximum of 80% has been treated.
2. Concentrate burning in conifer dominated slopes.
3. Ignitions would begin only after other project units have been treated mechanically and may take up to ten years to complete.
4. Ignitions would take place only when conditions as described in Burn Plan are met.
5. Promote regeneration of aspen stands.
